UI developer & Graphic Design • [UT Market](#)

Web Development

I have experience with HTML/CSS/JavaScript and JS frameworks such as React and Svelte on the frontend, and Python Django on the backend. I can implement a practical design approach to create accessible and responsive webpages that are search engine friendly. I

am also experienced working with & creating REST APIs.

Graphic Design

Being experienced in tools like Adobe Illustrator and Photoshop, I can create both digital and print designs by utilizing my knowledge of composition, color, and typography in design. My previous design works include infographics, advertisement posters, brochures, menus, banners, business cards, and more.

UI/UX

I have experience with tools such as Adobe XD and Figma to create user interfaces for webpages and mobile applications with an emphasis on usability.
